Goals

My current goals are to attain more knowledge in different variety of front-end programming language's such as React, JavaScript, Sass, jQuery, Angular JS and React.js

Hobbies

I have many hobbies that help me with work:

- **Playing chess** as it teaches skills that may help me as a programmer. Specifically, it teaches me excellent problem-solving skills, it teaches me ways to use different tools in my arsenal to attain my goals, and it also teaches me that there are many ways to tackle an issue, which is extremely true in programming.
- **Physical sports** such as Tennis and Football, which I enjoy playing as **it's** a very important factor for helping me, physically and mentally. which is needed a lot when coding for a long time.
- **Photography** in my spare time so it helps me with illustration designs when doing new projects.
- **Watching movies** and series helps me with communicating with colleagues and in social events.
- **Gaming** also helps me with communicating with colleagues and in social events.
